

Enabling TIFF Viewing in Internet Explorer 7

April 6, 2009

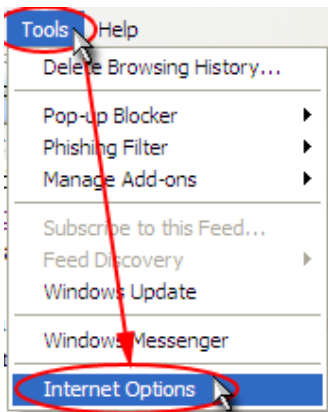

Background and Purpose

Often, TIFF viewing mode does not work in Microsoft Internet Explorer 7. You may receive a blank white rectangle, and possibly with some Script Errors the reference an "Invalid character" or "Object expected".

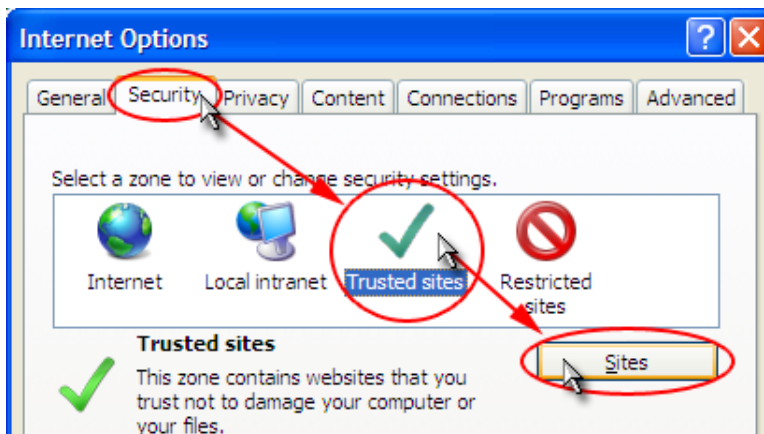

This is caused by a defect in Internet Explorer 7's security features. If you are receiving these errors, please try the following procedure.

Procedure

- 1) Open Internet Explorer 7.
- 2) Click on **Tools, Internet Options**.

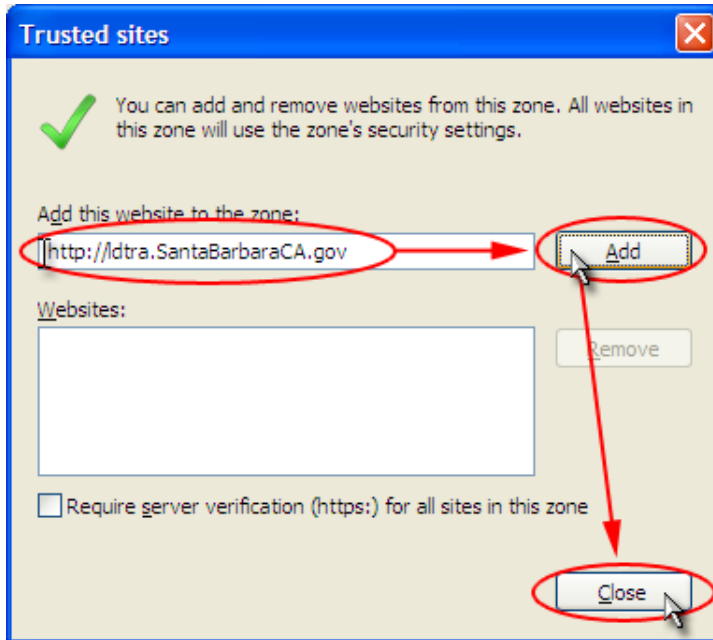

- 3) Click on the **Security** tab.
- 4) In the *Select a zone to view or change security settings* section, click on **Trusted sites**.
- 5) Click on the **Sites** button.
